

Sports

Lesson Aim

Using vocabulary related to sport by creating a vlog.

Warming up (10 minutes)

Resource: Sports Vlog

Watch some or all of the vlog with the class. Although students will not understand everything that is said, it will give them a good feel for life at an American school and the importance of sport there. For any students who don't watch vlogs, this will help them prepare for the main activity.

Activity 1 (30 minutes)

Resource: None

Divide the class into groups of three or four students. Their task is to make a vlog about sport. (If you prefer, you could be flexible and let them make the vlog about one of the other topics in this unit: daily life or travel.)

They should first write a plan of what they want to say and show. They should also make clear what the tasks are for each member of the group. The plan should be created during this lesson and you should approve it. The vlog can be made as homework and presented during a follow up lesson or handed in as homework.

Round up (5 minutes)

Resource: None

Check everyone has a plan and the groups are clear on their tasks.
